

## ***Everly Residents & Business's Save \$13,714.74***

In the month of October, Everly Municipal Utilities gave customers back \$13,714.74 in the form of a natural gas Fuel Adjustment (FA). Customers saw a Fuel Adjustment (FA) on their November 1<sup>st</sup> bill. These savings were made possible due to lower natural gas supply cost and prudent gas purchases made by the Everly Municipal Utilities Board.

Everly Municipal Utilities utilizes a Fuel Adjustment (FA) to adjust the price of natural gas supplied to its customers to reflect the Utilities costs of purchasing the gas. The wholesale price of natural gas is unregulated and fluctuates with market conditions. An FA allows Everly Municipal Utilities to adjust the amount charged to customers without changing the base rate for natural gas.

The Everly Municipal Utilities Board hopes to continue passing on savings to its customers this winter. For additional savings, Everly Municipal Utilities offers rebates on new, efficient natural gas furnaces, water heaters and home insulation. Free water heater blankets, water pipe insulation, and low flow shower heads are also available through Everly Municipal Utilities. By making your home more energy efficient you will also see savings on your monthly utility bills.
